

**AGENDA  
MEETING OF THE  
BOARD OF DIRECTORS OF THE  
SANTA CLARITA VALLEY  
GROUNDWATER SUSTAINABILITY AGENCY  
City of Santa Clarita  
Century Room  
23920 Valencia Boulevard  
Santa Clarita, CA 91355  
Monday, October 16, 2017 at 2:00 P.M.**

**1:50 P.M. City of Santa Clarita, Century Room - Open to Public**  
(Gathering of Board Members in the Century Room – No discussion of Agency business will take place prior to the Call to Order at 2:00 P.M.)

**OPEN SESSION BEGINS AT 2:00 P.M.**

SCV-GSA  
BOARD OF DIRECTORS  
PRESIDENT

**1. REGULAR PROCEDURES**

VICE PRESIDENT

- 1.1 Call to Order
- 1.2 Pledge of Allegiance
- 1.3 Public Comments – Members of the public may comment as to items not on the Agenda at this time. Members of the public wishing to comment on items covered in this agenda may do so now or prior to each item as they arise. Please complete and return a comment request form to the Board Secretary. (Comments may, at the discretion of the Board's presiding officer, be limited to three minutes for each speaker.) Members of the public wishing to comment on items covered in Closed Session before they are considered by the Board must request to make comment at the commencement of the meeting at 2:00 P.M.
- 1.4 Acceptance of Agenda

ADAM ARIKI  
B.J. ATKINS  
WILLIAM C. COOPER  
MITCH GLASER  
BOB KELLAR  
GARY MARTIN

SECRETARY

**2. SPECIAL PROCEDURES**

- 2.1 Election of President and Vice President and appointment of Board Secretary

**3. GENERAL AGENDA ITEMS**

- 3.1 \* Review and File Sustainable Groundwater Management Act: Overview of Purpose, Responsibilities and Authorities
- 3.2 \* Overview of Joint Powers Authority and Authorize Staff to Move Forward and Work Together on the Development of a Joint Powers Authority to Serve as a Permanent Structure for the SCV-GSA
- 3.3 \* Adopt a Resolution Granting a SCV-GSA Member Agency Authority to Submit an Application for Proposition 1 Grant Funding on Behalf of the SCV-GSA

**4. WRITTEN REPORTS FOR INFORMATION PURPOSES ONLY**

- 4.1 \* GSA Formation Work Group Report: Creation of a Groundwater Sustainability Plan

**5. CONSIDERATION OF POSSIBLE FUTURE AGENDA ITEMS**

**6. ADJOURNMENT**

\* **Indicates attachment**

◆ **To be distributed**

**NOTICES:**

Any person may make a request for a disability-related modification or accommodation needed for that person to be able to participate in the public meeting by telephoning (661) 297-1600, or writing to Santa Clarita Valley Groundwater Sustainability Agency at 27234 Bouquet Canyon Road, Santa Clarita, CA 91350. Requests must specify the nature of the disability and the type of accommodation requested. A telephone number or other contact information should be included so that Agency staff may discuss appropriate arrangements. Persons requesting a disability-related accommodation should make the request with adequate time before the meeting for the Agency to provide the requested accommodation.

Pursuant to Government Code Section 54957.5, non-exempt public records that relate to open session agenda items and are distributed to a majority of the Board less than seventy-two (72) hours prior to the meeting will be available for public inspection at the Castaic Lake Water Agency, located at 27234 Bouquet Canyon Road, Santa Clarita, California 91350, during regular business hours. When practical, these public records will also be made available on the Agency's Internet Website, accessible at <http://www.clwa.org>.

# SANTA CLARITA VALLEY GROUNDWATER SUSTAINABILITY AGENCY

October 6, 2017

**To:** SCV-GSA Board of Directors  
**From:** GSA Formation Work Group  
**Subject:** Review and File Sustainable Groundwater Management Act: Overview of Purpose, Responsibilities and Authorities

---

## BACKGROUND

The Sustainable Groundwater Management Act (ACT) was passed in 2014 and amended in 2015 to establish a statewide framework for sustainable local groundwater management. To comply with the Act local agencies must first form Groundwater Sustainability Agencies (GSAs) to implement required sections of the Act.

In Santa Clarita, a GSA Formation Work Group worked with a Department of Water Resources-funded facilitator to form the SCV-GSA by a Memorandum of Understanding (MOU). This process started in fall 2016 and included workshops and consideration of stakeholder input, Formation Work Group member reports to Boards and Council, adoption of a GSA-forming MOU, upload of all required GSA-forming documentation to the Department of Water Resources (DWR), the DWR's 90 day review period, and in September 2017, DWR designating the SCV-GSA as the exclusive local agency. The Santa Clarita Valley Groundwater Sustainability Agency (SCV-GSA) has completed the first step in this process by forming the GSA.

### Groundwater Sustainability Plan

All GSAs must develop a Groundwater Sustainability Plan (GSP) to address any undesirable results and to achieve sustainability over the long term. The Act requires that GSP development include stakeholder involvement and that the GSP consider interests of beneficial uses and users. The work effort to prepare a GSP will be extensive, requiring significant funding. The SCV-GSA must prepare, adopt, and submit to DWR its GSP in advance of the January 31, 2022 deadline. After submittal to DWR, DWR will post the GSP on its website and receive public comments for a period of not less than 60 days. Within two years of the GSA submitting its GSP to DWR, the DWR will evaluate the GSP, issue a written assessment and identify if the plan is approved, incomplete, or inadequate. The GSP must be adopted and used to manage the basin by January 31, 2022 and fully implemented by 2042.

### Governance and Organization

The SCV-GSA has latitude in determining its governance approach. It may use a Memorandum of Understanding (MOU), Joint Powers Agreement (JPA), or other legal agreement to operate the GSA. Recommendations regarding governance are documented in a separate report. While only specified public agencies may form a GSA, a GSA may form advisory groups as a means to receive information and views from various stakeholder groups. Based on the public outreach process the Formation Work Group has undertaken, it is recommended that the SCV-GSA form an advisory group.

### Statute Authorities

The Act grants broad authority to GSAs to carry out the purposes of SGMA. These authorities include the power to impose permit fees and fees on groundwater extractions to fund the costs of preparation of the GSP. After a GSP is adopted, the GSA's powers broaden. A number of the GSA's authorities are described below:

Chapter 5 of the Act includes that *after GSP adoption and submittal of the GSP* to DWR the GSA may:

- Adopt rules, regulations, ordinances, and resolutions
- Conduct investigations related to groundwater management
- Require well registration
- Require that groundwater extraction facilities use water measuring devices
- Require annual statements of groundwater extraction
- Report diversion of surface water to underground storage
- Acquire property
- Transport, reclaim, purify, desalinate, treat or otherwise manage and control polluted water, wastewater and other waters
- Impose spacing requirements on new wells and establish groundwater extraction allocations

Chapter 8 of the Act includes that a GSA may:

- Prior to adoption of a GSP, the GSA may impose fees, including but not limited to permit fees and fees on groundwater extraction to fund the costs of a groundwater sustainability program, including but not limited to preparation, adoption, and amendment of a GSP and investigations, inspections, compliance assistance, enforcement and program administration including a prudent reserve
- After adoption of a GSP, additional fees may be imposed on groundwater extraction to fund the cost of groundwater management, including but not limited to administration, O&M, a prudent reserve, acquisition of land or property, supply, production, treatment and distribution of water. Until a GSP is adopted a local agency may impose fees as long as a groundwater management plan is adopted prior to January 1, 2015

Chapter 9 of the Act includes that a GSA may:

- Assess civil penalties for extracting groundwater in excess of the amount that person is authorized to extract under a rule, regulation, ordinance, or resolution
- Assess civil penalties, up to \$1,000 plus an additional \$100 per day, on any person who violates any rule, regulation, ordinance, or resolution adopted by the GSA.
- Bring an action in superior court to determine whether a violation has occurred and to impose the above penalties after notice and an opportunity for a hearing.

### Funding

The Formation Work Group recommended that initial set up and administrative costs be shared equally by the SCV-GSA forming members. These costs are anticipated to be \$15,000 to \$20,000 each. Funding for preparation of the full GSP would be considered at the same time as discussions regarding SCV-GSA governance.

### **CONSIDERATIONS**

Early in this process, the SCV-GSA will consider its desired governance and the role of an advisory group or groups. It should consider approaches to fund the Agency, initiate planning for GSP development, and consider incorporation of authorities.

# SANTA CLARITA VALLEY GROUNDWATER SUSTAINABILITY AGENCY

October 6, 2017

**To:** SCV-GSA Board of Directors

**From:** GSA Formation Work Group

**Subject:** Overview of Joint Powers Authority and Authorize Staff to Move Forward and Work Together on the Development of a Joint Powers Authority to Serve as a Permanent Structure for the SCV-GSA

---

## PURPOSE

- Provide overview of formation of Joint Powers Authority, including voting, funding, budgeting, staffing, advisory committees, consideration of new authorities, and meeting frequency.

## BACKGROUND

The Sustainable Groundwater Management Act (Act) specifically provides that a combination of local agencies may form a single GSA through a joint powers agreement, memorandum of understanding, or other legal agreement. (Water Code Section 10723.6.) As indicated in previous memos, the SCV-GSA was formed pursuant to a Memorandum of Understanding between the members of the SCV-GSA (MOU). This was done as a first step to meet the GSA formation deadline and with it in mind that the members would decide upon a permanent governance structure as one of the first items of business. There are distinct differences that are important to highlight between using a joint powers agreement and a memorandum of understanding, and/or other legal agreement. With a joint powers agreement, the parties would be creating a new public entity (joint powers authority - JPA) and the mutually negotiated agreement would define the composition and decision-making process of the JPA. The JPA would have independent authority to transact business, obtain insurance coverage, contract with third parties, own and manage property and public works, and hire employees and contract for services, among other things. In addition, as a separate legal entity, the JPA would be liable for its own acts and omissions and liability would generally not run to its members. The joint powers agreement would define the decision-making process, as well as the obligations of each party to the agreement and as a participant in the JPA.

With an MOU or other form of legal agreement, a new legal entity would not be created. Instead, the participating members would collectively act as the GSA and the MOU and any other legal agreements would define the composition and decision-making process, as well as be the basis for the management, administration, and operations of the members. Further, absent a separate legal entity, liability for actions of the GSA would run to its members which would share responsibilities and liabilities through separate agreements. Under this approach, the members could consider designating a lead entity to administer the SCV-GSA or administer it through some form of joint operations agreement. While the Act allows for GSAs to be formed and operated pursuant to an MOU or other legal agreements and some basins have decided to do this, it has not generally been envisioned as a permanent management structure.

Legal counsel for the members have conferred and all agree that a JPA is the better approach for the permanent governance structure for the SCV-GSA. A JPA is a more straightforward and less complicated structure than an MOU and it offers more protections to the members.

After the Board has made a decision whether to move forward with a JPA or continue with an MOU, the Board should have a larger discussion regarding the governance elements within those structures, such as funding and cost allocation, voting, the setting up of advisory committees, and meeting schedules.

### **STATUS**

As indicated above, the GSA has been created by a very basic MOU. At this point, the Board should decide whether to proceed with the development of a JPA or to proceed with the MOU and any necessary agreements to define how it will operate.

### **RECOMMENDATION**

That the Board authorize the Formation Work Group to move forward and work together on the development of a JPA to serve as a permanent structure for the SCV-GSA. The details of any joint powers agreement would be presented to the Board and be subject to Board approval.

RDV

# SANTA CLARITA VALLEY GROUNDWATER SUSTAINABILITY AGENCY

October 6, 2017

**To:** SCV-GSA Board of Directors  
**From:** GSA Formation Work Group  
**Subject:** Adopt a Resolution Granting a SCV-GSA Member Agency Authority to Submit an Application for Proposition 1 Grant Funding on Behalf of the SCV-GSA

---

## PURPOSE

- Provide an overview of the Proposition 1 funding opportunity and an approach to apply for a grant.
- Recommend approval of the attached resolution that would allow for submission of a grant application and execution of a grant agreement.

## BACKGROUND

The Santa Clarita Valley Groundwater Sustainability Agency (SCV-GSA) forming MOU identifies that the parties will work together to seek grant funding. The California Department of Water Resources (DWR) has issued a Final Proposal Solicitation Package (PSP) for Groundwater Sustainability Plans and Projects. This Proposition 1 grant opportunity can provide up to 50% funding for specific components, or potentially all components, of an applicant's Groundwater Sustainability Plan (GSP).

Completed grant applications are due to DWR November 13, 2017, less than one month after the first meeting of the SCV-GSA. If all grant funding is not awarded as a result of this first application period, a subsequent application period is anticipated to be open during June 2018 through August 2018.

Because of this short timeframe and no assurance of round two funding being available, the GSA Formation Work Group initiated work in support of an application. The SCV-GSA has not yet established a source of revenue to meet the grant's minimum 50% matching obligation, the work group recommends a member apply for the grant on behalf of the SCV-GSA.

The PSP requires applicants submit a complete grant application that includes:

- Authorization and certification of eligibility (i.e. current Urban Water Management Plan, compliance with the California Statewide Groundwater Elevation Monitoring Program, etc.)
- Project justification and description
- Work plan including description of how the requested funding for specific components will lead to the full GSP
- Budget, including cost share funding and total proposal cost
- Schedule
- Identification of and any Benefits to disadvantaged communities, economically distressed areas, and severely disadvantaged communities.

The PSP provides the opportunity for a GSA to apply for funding all or a portion of work required to develop a GSP. As the detailed work plan for the GSP has not yet been developed, the approach recommended by the Formation Work Group is to focus on (1) updating and enhancement of the groundwater modeling

tools, (2) updating of water quality management plans, (3) conducting studies that address groundwater operations on groundwater dependent ecosystems and adjoining GSAs, (4) facilitation of public involvement, and (5) grant administration.

Anticipated Activity Leading Up to the Application and Grant Agreement Execution Deadlines:

CLWA has contracted with Kennedy/Jenks Consultants and GSI Water Solutions, Inc. to develop an application and detailed scope of work for those portions of the GSP work plan that can be identified at this time. As part of assembling required information for the grant application, it would be beneficial for the SCV-GSA to hold a brief workshop to present the grant application approach, identify where potential grant funded components connect to required GSP components, and to describe at a high level the required GSP components and approaches to completing the GSP.

We anticipate that if a grant award is provided to the SCV-GSA, it would be provided in December 2017. We anticipate that as soon as January 2018 or February 2018, DWR would seek to execute a grant agreement. CLWA has indicated a willingness to apply for the grant on behalf of the SCV-GSA, but it is not in a position to front the full minimum 50% cost share for all the parties to the MOU. Therefore, prior to execution of a grant agreement, the parties to the MOU must identify their cost share for the grant in order for CLWA to execute the grant agreement.

**FINANCIAL CONSIDERATIONS**

The short term cost to develop the grant application is estimated to be \$50,000 and includes consultant development of grant required scopes, schedules, and budgets for work products and development and submittal of the grant application.

The total cost of GSP components identified in the grant application is currently estimated at \$500,000. Costs to commence the grant funded work could be incurred as early as spring 2018. A cost estimate to complete the full GSP can be developed after the GSP is more fully scoped.

**RECOMMENDATION**

The GSA Formation Work Group recommends (1) approval of the attached resolution that would allow for submission of the grant application and execution of a grant agreement, and (2) direct Formation Work Group members hold a workshop support the grant application effort in advance of submitting the grant application.

**RESOLUTION NO. \_\_\_\_**

**RESOLUTION OF THE BOARD OF DIRECTORS OF THE  
SANTA CLARITA VALLEY GROUNDWATER SUSTAINABILITY AGENCY AUTHORIZING  
THE CASTAIC LAKE WATER AGENCY TO SUBMIT A GRANT APPLICATION ON BEHALF  
OF THE SGV-GSA FOR “EARLY COMPONENTS OF THE SCV-GSA GROUNDWATER  
SUSTAINABILITY PLAN” AND EXECUTE AN AGREEMENT WITH THE STATE OF  
CALIFORNIA FOR A 2017 SGWP GRANT ON BEHALF OF THE SCV-GSA UNDER THE  
CONDITION THAT PRIOR TO EXECUTION OF THE GRANT AGREEMENT, THE MEMBERS  
DEVELOP A COST SHARE AGREEMENT TO FUND THE GRANT COST SHARE AND  
APPLICATION COSTS**

**WHEREAS**, Castaic Lake Water Agency (CLWA), along with its regional partners Newhall County Water District, Los Angeles County Waterworks District No. 36, the Santa Clarita Water Division, the City of Santa Clarita, and the County of Los Angeles (each a “member” and collectively the “members”) jointly formed the Santa Clarita Valley Groundwater Sustainability Agency (SCV-GSA) through a Memorandum of Understanding (MOU) on May 24, 2017; and

**WHEREAS**, the MOU identifies that the parties agree to cooperate and coordinate in pursuing State grant and loan funding opportunities that may apply to carrying out the Sustainable Groundwater Management Act (SGMA) in the basin; and

**WHEREAS**, on September 13, 2017 the California Department of Water Resources (DWR) named the SCV-GSA as the exclusive GSA in the Santa Clarita Valley; and

**WHEREAS**, the Sustainable Groundwater Management Act (SGMA) requires that the SCV-GSA develop a Groundwater Sustainability Plan (GSP); and

**WHEREAS**, DWR is administering the Sustainable Groundwater Planning Grant Program, using funds authorized by Proposition 1, to encourage sustainable management of groundwater resources that support SGMA; and

**WHEREAS**, the State released the “Final Proposal Solicitation Package For Groundwater Sustainability Plans and Projects” (PSP) and proposals are due by November 13, 2017; and

**WHEREAS**, a second grant application period, if grant money is still available, is anticipated during June 2018 through August 2018; and

**WHEREAS**, the grant application process includes many requirements and considerations including: a) the SCV-GSA adopt a resolution affirming that a member of the GSA is authorized to submit the grant application and execute a grant agreement on behalf of the SCV-GSA, b) the application identify the total local cost share that will be committed to the proposal, and c) the grant program requires a minimum local cost share of 50% of total proposal cost; and

**WHEREAS**, because the SCV-GSA has not developed a budget, the grant application will require that the GSA member who applies on behalf of the SCV-GSA commit to providing the minimum local cost share of 50% of the total proposal cost; and

**WHEREAS**, CLWA is willing to apply for the grant funds and make the necessary commitments on behalf of the SCV-GSA; and

**WHEREAS**, the total project cost to fund “Early Components of the SCV-GSA Groundwater Sustainability Plan” is currently estimated at \$500,000; and

**WHEREAS**, the short term cost to develop the grant application is estimated to be \$50,000 and includes consultant development of grant required scopes, schedules and budgets for work products and development of the grant application; and

**WHEREAS**, the MOU provides the procedure for sharing of grant related cost recovery and the members have agreed in concept to provide said financial support; and

**WHEREAS**, On October \_\_, 2017 SB 634 was passed providing that the Santa Clarita Valley Water Agency shall be the successor agency to CLWA beginning on January 1, 2018;.

**NOW, THEREFORE, BE IT RESOLVED**, by the Board of Directors, the governing body of the Santa Clarita Valley Groundwater Sustainability Agency, resolves and orders as follows:

1. Castaic Lake Water Agency is authorized by the SCV-GSA to submit a grant application on behalf of the SCV-GSA to the California Department of Water Resources to obtain a grant under the 2017 Sustainable Groundwater Planning Grant Program pursuant to the Water Quality, Supply, and Infrastructure Improvement Act of 2014 (Proposition 1) (Water Code Section 79700 et seq.)
2. Castaic Lake Water Agency is authorized to enter into an agreement on behalf of the SCV-GSA to receive a grant for “Early Components of the SCV-GSA Groundwater Sustainability Plan.”
3. The General Manager of the Castaic Lake Water Agency, or his designee, is hereby authorized and directed to prepare the necessary data, conduct investigations, file such application, and execute a grant agreement on behalf of the SCV-GSA with the California Department of Water Resources under the condition that prior to execution of the grant agreement the members adopt a cost share agreement to fund the preparation of the GSP including reimbursement of grant cost matching funds.

# SANTA CLARITA VALLEY GROUNDWATER SUSTAINABILITY AGENCY

October 3, 2017

**To:** SCV-GSA Board of Directors  
**From:** GSA Formation Work Group  
**Subject:** GSA Formation Work Group Report: Creation of a Groundwater Sustainability Plan

---

## PURPOSE

- Provide an overview of the requirements to prepare a Groundwater Sustainability Plan (GSP).

## SUMMARY

The Sustainable Groundwater Management Act (Act) requires Groundwater Sustainability Agencies (GSAs) develop Groundwater Sustainability Plans (GSPs). Following the effective date of the Act, the State developed emergency regulations for GSP content. The Santa Clarita Valley Groundwater Sustainability Agency's (SCV-GSA's) GSP must be in place to manage the basin by January 31, 2022.

### Elements of a Groundwater Sustainability Plan

A GSP is a locally created plan that allows for sustainable management of groundwater over the long term. It will describe the sustainability goal for the basin and measures to meet the sustainability goal, if not already met.

The State's checklist of a GSP includes the following:

- Protocols for monitoring and data management
- Comprehensive description of the GSA and its authorities. This includes descriptions of water resources monitoring and management plans, land use considerations, actions related to addressing undesirable results, description of beneficial uses and users and public outreach efforts
- A hydrogeologic conceptual model for the basin that includes a description of groundwater conditions and water budget information
- Sustainability goals and descriptions of undesirable results, minimum thresholds, and measurable objectives
- Monitoring networks and descriptions of how they will be used to measure progress toward reaching sustainability
- Documentation of adaptive management strategies
- Projects and management actions that will help achieve the basin's sustainability goal, along with a description of permitting and regulatory processes and time tables.
- Any coordination agreements, including responsibilities of each agency, procedures for resolving conflict, and how the agencies use consistent data and methodologies to coordinate GSPs

Undesirable results mentioned above are further defined by DWR as follows:

- Chronic lowering of groundwater levels indicating a significant and unreasonable depletion of supply if continued over the planning and implementation horizon
- Significant and unreasonable reduction in groundwater storage
- Significant and unreasonable seawater intrusion

- Significant and unreasonable degraded water quality, including the migration of contaminant plumes that impair water supplies
- Significant and unreasonable land subsidence that substantially interferes with surface land user
- Depletions of interconnected surface water that have significant and unreasonable adverse impacts on beneficial uses of the surface water. (Frequently referred to as GDEs)

### Process for Developing a Groundwater Sustainability Plan

The process for the development of Groundwater Sustainability Plans can be described as a series of administrative and technical steps, some being interrelated. Preparation and adoption of a GSP is exempt from CEQA, but planning related projects that would significantly affect water supplies for fish and wildlife are not exempt. The Act and GSP regulations require significant outreach efforts to a wide group of stakeholders. Outreach efforts and public involvement are required to be thoroughly documented and it is anticipated that lack of public outreach could serve as a challenge to the adequacy of an adopted GSP. Completing technical steps will require an extensive work effort which will include updating the existing groundwater model, evaluation of any undesirable results, development of sustainability goals, and development of a data management system and incorporation of data.

The SCV-GSA must prepare, adopt, and submit to DWR its GSP in advance of the January 31, 2022 deadline. After submittal to DWR, DWR will post the GSP on its website and receive public comments for a period of not less than 60 days. Within two years of the GSA submitting its GSP to DWR, the DWR will evaluate the GSP, issue a written assessment and identify if the plan is approved, incomplete, or inadequate. The GSP must be adopted and used to manage the basin by January 31, 2022 and fully implemented by 2042.

### Ongoing Monitoring and Reporting

The SCV-GSA will conduct monitoring and provide required annual monitoring reports to DWR. DWR will review annual reports and conduct a more detailed review of monitoring results every 5 years. Addressing any undesirable results and reaching sustainability requires meeting interim milestones (verified every five years). For example, a GSP for a coastal basin with seawater intrusion may have interim milestones over the 20 year planning horizon to increase groundwater elevations to eliminate ongoing seawater intrusion. DWR would track the GSA's progress toward meeting the interim milestones.

### **CONSIDERATIONS**

The SCV-GSA will need to develop a plan, schedule, budget, and funding strategy to complete GSP development by the deadline. The funding contribution from SCV-GSA members will need to be determined. The SCV-GSA will consider the merits of pursuing grant funding for GSP component development during its first Board meeting.
